Friend Garrison

In O Johnson's

Johnson's letter to you, in the last Liberator, I find the following:—

"The Anti-Slavery Car has rolled forward thus far not only without the aid, but against the combined influence of the ministers & churches of the country."

Now I take the liberty to say that this, as it stands, is a false statement, and one proof is, a statement of your own in one of the editorial articles in the same paper viz. that "a very large proportion of the anti-slavery agents in the field are ministers, or those who are preparing for the ministry — the exceptions, we believe, are rare." The fact you here state is true, & has been so from the first. The simple fact in the case is that the body of the people & the clergy both have stood in opposition to the Anti-Slavery cause. In this matter it has been "like Priest, like people". While this has been true of each as a body, it has also been true that a portion of each have come over to the cause, & not only so, but that of those of this portion, who have gone into the field as agents, lecturers &c, have full three fourths been "ministers or persons preparing for the ministry". That ministers as a body have sinned inexcusably & grievously in this matter I admit — that those who have done so deserve rebuke I admit — that there should be no lowering of the Standard to gain ~~them~~ as still stand aloof I admit, and that brother Johnson's statement above, and one or two others of a similar character in

his Letter, is not true & also
necessary more fully to prove
admit, & stand ready when
